

GOODFELLOW *Terra*®

Earth Tone Ecological Treated Wood

ENVIRONMENTAL CERTIFICATIONS

Goodfellow Terra® Pressure Treated Wood is processed using patented MicroPro® micronized copper preservative. This technology reduces the environmental footprint of Terra to less than half that of traditional residential treated wood.

Environmentally Preferable Product (EPP)

MicroPro is the first and only wood treatment process to be certified as an Environmentally Preferable Product (EPP), by Scientific Certification Systems (SCS), based on Life-Cycle Assessment.

TREATED WOOD PROCESS

Largely eliminates copper releases – Wood products treated with the MicroPro process result in the release of 90% to 99% less copper into aquatic and terrestrial environments when compared to standard treated wood products. The very small amount released bonds readily to organic matter in the soil and becomes biologically inactive, thus effectively eliminating eco-toxic impacts.

Goodfellow Terra pressure treated wood products can be used in freshwater docks and raised garden beds/planters.

Home Innovation NGBS Green Certified

MicroPro technology has been approved for points toward National Green Building Certification to the National Green Building Standard. Wood products treated with this technology are now eligible for more green building points than any other treated wood product in the market.

UL GREENGUARD GOLD Certification

UL GREENGUARD GOLD Certification indicates that MicroPro preservative technology has undergone rigorous testing and has met stringent standards for low volatile organic compound (VOC) emissions – helping to reduce indoor air pollution, minimize chemical exposure and create healthier indoor environments.

Goodfellow Terra products treated with the MicroPro technology are suitable for use in schools and office construction, and to create products such as children's playsets.

Global Green Tag

MicroPro Wood Treatment Technology has achieved excellent ratings after undergoing two rigorous, independent third-party assessment processes by world-leading product certification body Global GreenTag International. MicroPro Wood Treatment Technology has achieved a Level A, the highest score, under Global GreenTag's GreenRate™ product sustainability certification system. The Global GreenTag Product Health Declaration™ (PHD) is recognized by LEED and the WELL Building Standard.
